#### DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicants' response, filed 20 September 2004, has been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 13-16 are currently pending.

### **Information Disclosure Statement**

The Information Disclosure Statement filed 19 November 2004 has been fully considered. A signed copy of PTO Form 1449 is included with this Office Action.

# Claim Rejections - 35 USC § 112-1st Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-16 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, as set forth in the Office Action dated 19 May 2004. The

Application/Control Number: 09/873,645 Page 3

Art Unit: 1631

claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant argues the following:

- "Various reasons for grouping of a plurality of chromatographic elution profiles 1. are taught in the instant application. Perhaps the most basic and well understood need for grouping is taught at page 24, line 28 through page 25, line 6". This is not persuasive in that the specification fails to disclose what a group of profiles represents/means, as pointed out in the previous Office Action. It may be true that grouping can correct variation in the profiles. However there is no disclosure in the specification as to how the groups are made or what parameters may be involved in placing one elution profile into one group versus placing an elution profile into a different group. Further, there is no disclosure as to the significance of the groups. The preamble states that the system is for grouping the elution profiles. There is no indication as to what the grouping is for or what the outcome of that grouping may be or how to group. Without such disclosure, the claims are not enabled.
- "Also made clear in the MPEP § 2164.08 and by the courts is that one does not 2. look to the claims but to the specification to find out how to practice the claimed invention". This is not persuasive as MPEP § 2164.08 [R-2] also states that the specification must teach how to make and use the full scope of the claimed invention. See below.

The Federal Circuit has repeatedly held that "the specification must teach those skilled in the art how to make and use the full scope of the claimed invention without undue experimentation'." In re Wright, 999 F.2d 1557, 1561, 27 USPQ2d 1510, 1513 (Fed. Cir. 1993). Nevertheless, not everything necessary to practice the invention need be disclosed. In fact, what is well-known is best omitted. In re Buchner, 929 F.2d 660, 661, 18 USPO2d 1331, 1332 (Fed. Cir. 1991). All that is necessary is that one skilled

Application/Control Number: 09/873,645

Art Unit: 1631

in the art be able to practice the claimed invention, given the level of knowledge and skill in the art. Further the scope of enablement must only bear a "reasonable correlation" to the scope of the claims. See, e.g., In re Fisher, 427 F.2d 833, 839, 166 USPQ 18, 24 (CCPA 1970).

In the instant case, the specification fails to teach how to group, which is the essential matter in the instant claims. Without such knowledge or teachings in the specification, the claims are not enabled.

Applicant argues that the Examiner has suggested including certain phraseology into the claims. The Examiner has not made suggestions, rather the Examiner has merely raised questions with regard to enablement of the instant claims, as the specification does not teach how to group or what the information from the shifted profile means. Without such knowledge, one of skill in the art would not know how to practice the invention without undue experimentation. For these reasons and those previously set forth, the rejection is maintained.

# Claim Rejections - 35 USC § 112-2<sup>nd</sup> Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites "wherein the processor: (a) overlays said profiles etc...". It is unclear how the intended steps limit the recited device. It is unclear whether Applicant intends a processor comprising instructions for overlaying said profiles etc... Clarification is requested.

Art Unit: 1631

### Conclusion

Rejections under 112, 1st paragraph with regard to enablement are maintained.

Rejections under 112, 1st paragraph with regard to written description have been withdrawn in view of Applicants amendments.

### **Inquiries**

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR § 1.6(d)). The Central Fax Center Number is (571) 273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lori A. Clow, Ph.D., whose telephone number is (571) 272-0715. The examiner can normally be reached on Monday-Friday from 10 am to 6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, Ph.D., can be reached on (571) 272-0718.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
